Pugs. There is a lot to love about them over the years. The 405 rep specials were great, the load lugging and largely unbreakable 505s. GTis were great too, until that is now. Putting the GTi sticker on an electricity car is a brave move. Sure, they are quick, but blimey are they're heavy. So not really a GTi anymore, which is why we are sticking up for the originals. Matthew Corrigan, who knows all about them and owns one, read his opinion and buy his book. See you next time...

Free Car Mag continues the fight for motoring freedom, sticking up for drivers and those who want the freedom to choose what to drive and when to drive it. There will be stories that can't be read anywhere else and that should be reason enough to come back for more.
