# Window Tinting Explained

## ZENITH

Another ceramic tint is Zenith. Although this product is not the lightest tint among KEPLER's Automotive series, Zenith is considered the lightest visible window film choice.

Zenith is perfect for those looking for a barely noticeable tint.

## PHOTON

The last tint on this series is Photon, the lightest shade of the five, making it popular for windshields and front windows.

Photon is famous for customers who do not want their tints to be visible without sacrificing UV and heat protection.

# FCM 149

Free Car Mag continues the fight for motoring freedom, sticking up for drivers and those who want the freedom to choose what to drive and when to drive it. There will be stories that can't be read anywhere else and that should be reason enough to come back for more.
